25X1

The following assignments for the development of new optical sensor subsystems are made to take full advantage of technical capability and experience of the agencies involved.

(1) The CIA will develop the improvements in the Corona general search optical sensor subsystems.

(2) Following the selection of a concept, and a contractor, for full-scale development, in the area of advanced general search, the CIA will develop the optical sensor subsystem for that system.

25X1

The Director, NRO will, in managing the corresponding over-all systems developments, ensure that:

(1) The management of and contracting for the sensors is arranged so that the design and engineering capabilities in the various contractors are most efficiently utilized.

(2) The sensor packages and other subsystems are integrated in an over-all system engineering design for each system, with ~~SAFSP~~ *systems integration* having responsibility to DNRO for the management of each over-all system. *having responsibility*

After a sufficient number of R&D flights (approximately 4), the responsibility for operation of the optical subsystems will pass from the developer; corresponding improvement programs will remain with the developer.

NRO review(s) completed.
